

Flux

What the Flux

At 35cm in length the Flux will be the lightest and most compact certified ice axe with a full steel pick on the market.

Designed to be an indispensable piece of kit, the Flux is suited for a variety of terrains such as: summer alpine rock climbing, ski mountaineering, ski touring and winter fell running. The Flux is light and compact enough to carry easily, fitting into most backpacks comfortably.

High strength tempered steel pick and hammer for placing pegs and a lightweight Aluminium spike, this little axe is small but mighty with the durability you have come to expect from DMM

FLUX V01

FEATURES

- Lightest axe with a full steel pick.
- Shortest axe on the market at 35cm.
- Great for fitting inside a bag or clipping to a harness.
- Durable high-strength steel pick, with hammer for placing pegs.
- Compatible with DMM sliding rest.
- Refined full steel pick optimised for a variety of alpine terrain.
- Strong and light anodised aluminium shaft, with CNC machined grip grooves for extra security.
- Large tethering points in the head and spike for ease of clipping and security.
