

Vertex

A lightweight technical mountaineering tool with modular pick system, for use in a wide variety of winter and alpine environments.

The shaft geometry is straight enough to be efficient on less steep ground and for plunging in snow yet curved enough to have a precise swing and provide clearance over ice bulges.

FEATURES

- Refined pick geometry optimised for ice climbing.
- Sliding Finger Rest compatible with Vertex, Spire and Spire Tech
- High strength steel alloy pick, spike, adze/hammer for excellent durability.
- Minimalist hot forged head, for strength and durability. Designed to comfortably fit the hand.
- Raised spline on pick allows the tool to be used with, or without, an adze or hammer.
- DMM's tried and tested highly functional compact adze, perfectly formed for cutting out belays and preparing ice screw placements.
- New compact hammer ideal for driving in pitons and adding weight to the swing of the axe.
- Equal weights on both the adze and hammer, give a balanced swing when using two tools.
- Strong and light anodised aluminium shaft, for reliable support.
- Large tethering points in the head and spike, for ease of clipping and security.

TECH SPECS

DESCRIPTION	PRODUCT CODE	COLOUR	LENGTH	WEIGHT	CONFORMANCE
Vertex Adze	A0471	Red	55cm	445g	EN13089:2011 Type 2
Vertex Hammer	A0472	Red	55cm	445g	EN13089:2011 Type 2
Vertex Adze	A0473	Red	50cm	430g	EN13089:2011 Type 2
Vertex Hammer	A0474	Red	50cm	430g	EN13089:2011 Type 2
Sliding Finger Rest	A0470SR	Black	-	24g	N/A
